

Video: Medicine and Health

Develop advanced research techniques specific to clinical and public health. Expert video tutorials bring the practical application in a clinical setting to life, with case studies, in-practice films, and interviews. Go beyond text and theory to see methods in action, from clinical research, to epidemiology, to public health studies.

Use this collection to

- Master relevant methods in medical research through video tutorials featuring academic and professional experts
- Review key methods concepts at your own pace, watching, clipping, or downloading for later, as necessary
- Learn from recent events with content specific to the COVID-19 pandemic
